

ConEdLink now allows regional education coordinators (and their regional bosses) to select your region's preferred Class Evaluation Summary Mode.

If you are one of the above-mentioned authorities, when you log into ConEdLink, you will now see a "Config" tab. Click it, and ConEdLink will let you set the Eval Summary Mode to Optional, Hidden, or Mandatory. Each mode is explained, and your selection will instantly change the way ConEdLink behaves. As mentioned before, the default is Optional.

Please give it a try now:

Obviously we failed to anticipate the wide variability in how class evaluation summaries were being treated. We're going to very quickly revise ConEdLink to be more flexible. The default will be to present optional eval summary fields to the sponsor, but we'll ultimately be able to turn off the eval summary features altogether, or make them fully mandatory, on a per-region basis. We may even make it so the region can control these features at-will instead of having to contact us.

We'll be back in touch.

From Kevin Andrew Lipscomb on 2013-07-21 18:32:

Education stakeholders,

In response to requests from some regions, we have now integrated Class Evaluation Summary features into ConEdLink.

When a sponsor has built its roster and indicates they are ready to close the class and submit it to the region for credit, ConEdLink will present the sponsor with five free-text fields where they can enter the information that they would've had to supply on the PA DOH EMS Class Evaluation Summary form.

Currently, completing this "eval summary" section is optional -- a sponsor can close a class and submit it to the region even if they leave the eval summary section blank. This is because our understanding is that submission of the eval summary information is not being enforced by all regions. We can easily make these fields mandatory if all ConEdLink regions agree that submission of this information should be mandatory.

There is currently no support in ConEdLink for submitting eval summary information retroactively. The features are only available for future rosters and for rosters that are currently open.

Wherever ConEdLink displays the class roster for review, it will also now display the eval summary section adjacently.

Please let me know if you have any questions or concerns about the new features.
