## **Notice of EMSOF Funding Priorities**

[37 Pa.B. 2903] [Saturday, June 23, 2007]

Under 28 Pa. Code §§ 1001.22 and 1001.23 (relating to criteria for funding; and allocation of funds), the Department of Health (Department) gives notice of priorities for the distribution by the regional emergency medical services (EMS) councils of funding from the Emergency Medical Services Operating Fund (EMSOF) for the fiscal year beginning July 1, 2007, and ending June 30, 2008.

EMSOF moneys are to be used to provide funding to maintain, improve and develop the quality of the EMS system within this Commonwealth. The Department finds that EMSOF is not sufficient to fully fund the EMS system. Therefore, it gives notice, under 28 Pa. Code § 1001.22(d), that recipients of EMSOF funding from regional EMS councils may be required to contribute funds toward all purchases, acquisitions and projects for which the Department permits the use of EMSOF moneys.

Each regional EMS council shall prioritize the distribution of its EMSOF allocation based upon the Statewide EMS Development Plan and its regional EMS development plan, subject to the funding priorities set forth in this notice. By September 30, 2007, the regional EMS councils shall notify the providers and other appropriate entities of the established funding priorities, the application process, acquisition documentation requirements and processing deadlines. Each regional EMS council must complete all documents required for the distribution of EMSOF funding by June 30, 2008.

The Department may increase the amount of the initial payment or reimbursement from EMSOF based upon the EMS development plans (State and regional) or documented financial hardship of a provider of EMS. A provider of EMS that seeks additional funds due to financial hardship shall be required to submit a financial disclosure statement and other documentation deemed necessary by the Department.

A provider of EMS applying for EMSOF funding must be in full compliance with all regulations, policies and priorities of the State and regional EMS systems.

Funds for purchases, acquisitions and projects for the fiscal year beginning July 1, 2007, and ending June 30, 2008, must be expended by the regional EMS council by June 30, 2008, unless a written request for an extension of time, not to exceed 90-calendar days, is submitted by the regional EMS council and approved by the Department prior to June 30, 2008.

## Funding Priorities

These priorities are not ranked. The priorities must be considered before there is any regional distribution of EMSOF moneys for initiatives that are not listed. All funding must be distributed consistent with the regional and Statewide EMS development plans. Consequently, if the priorities in this notice have been funded and additional funding is available, the request to use EMSOF money towards nonpriority items must still be supported by the Statewide and regional EMS development plans.

- \* Development or improvement of an organizational risk management program (safety measures, hazard recognition/mitigation and the necessary organizational structure and support processes) proposed by an ambulance service. Proposals for funding must be comprehensive and include safe vehicle operations. Approval by the Department is required prior to funding.
  - \* Recruitment and retention programs, including scholarships/tuition reimbursement for emergency

medical technician (EMT) and paramedic training in areas with high prehospital personnel vacancy rates as determined by the regional EMS council and approved by the Department.

- \* Automatic external defibrillators (AEDs) and upgrade to current standards for Department recognized quick response services (QRSs) and basic life support (BLS) ambulance services.
- \* AED trainers at current standards and CPR manikins for Department recognized QRSs and BLS ambulance services.
  - \* Equipment required to meet BLS and advanced life support (ALS) ambulance service licensure.
  - \* Capnography equipment (especially wave-form end-tidal CO<sub>2</sub> monitors).
- \* An ambulance for ambulance services that is older than 10 years or has more than 200,000 miles on it. Limit to one per fiscal year.
- \* Software/computer equipment to enable services to collect and transmit EMS patient care reports electronically.
- \* Communication equipment and capabilities for EMS response in areas with poor to no communication capability between ambulances and medical command facilities or between ambulances and receiving facilities.
  - \* Quality assurance/improvement program.
- \* EMS personnel protective respiratory equipment approved by the Department to protect the EMS practitioner from communicable diseases transmitted from person to person through airborne mechanisms.
- \* Reflective chevron markings on back of new and existing ambulances. Funding shall be provided to cover the cost of the chevron up to 100% of the maximum allowable cost.

When two or more ambulance companies have consolidated, for the first 5 years after the ambulance companies completed consolidation the entity may be deemed eligible to receive funding not to exceed the amount of the combined total for which the individual companies would have been eligible had they not consolidated.

Emergency Preparedness and Response Funding Requests

Emergency preparedness and response funding requests must be based on local and response roles of services, regional needs, and needs identified by threat vulnerability analysis. Purchases must be coordinated with County emergency, fire service, HAZMAT and hospital organizations in the applicant's service area to assure interoperability and to prevent duplication. Funding requests related to response to terrorism and emergency preparedness must have a clear connection to the regional EMS catastrophic plan and the regional EMS development plan. Priority will be given to fund the ambulance services in each region that have committed to participating in the EMS surge capability project and respond to requests for EMS, both interstate and intrastate, as identified in the State and regional catastrophic casualty care plans.

#### Provider Equipment

Purchases by providers of EMS are not limited to equipment. If an EMS provider requests EMSOF moneys to purchase equipment, the Eligible Provider Equipment List identifies equipment for which EMSOF funds will be made available to purchase. This chart identifies the types of providers of EMS eligible for equipment purchases supported by EMSOF funding and the maximum allowable cost upon which the EMSOF contribution will be calculated.

EMSOF funds will fund 60% of the maximum allowable cost of an equipment item for rural providers and will fund 50% of the maximum allowable cost of an equipment item for nonrural providers. An eligible

provider is responsible for the balance of the purchase price. The provider may purchase an item for an amount that exceeds the maximum allowable cost, but the provider will be responsible for any amount exceeding that figure. The last two columns of the chart identify the percentage of EMSOF contribution towards the purchase price, up to the maximum allowable cost of the item, based upon whether the provider operates in a rural or nonrural area.

Funding of a QRS or BLS ambulance service to purchase an AED must occur prior to the service being approved to receive EMSOF funds towards the purchase of any other equipment. Funding to upgrade an AED to meet current standards may be granted at 100% of the cost of the upgrade up to a maximum allowable cost of \$400 per AED.

#### Paramedic Examinations

Funding may be provided to services to cover the cost of the State written test for paramedic certification taken by their personnel at 100% of the cost of two examination attempts up to a maximum allowable cost of \$300 per person.

Questions regarding the Eligible Provider Equipment List or other matter addressed in this notice should be directed to Joseph W. Schmider, Director, Bureau of Emergency Medical Services, Pennsylvania Department of Health, 1032 Health and Welfare Building, Seventh and Forster Streets, Harrisburg, PA 17120, (717) 787-8740. Speech or hearing impaired persons may use VTT (717) 783-6514 or the Pennsylvania AT&T Relay Service at (800) 654-5984. Persons with a disability who require an alternative format of this notice (for example, large print, audiotape, Braille) should contact Joseph W. Schmider at the previously listed address or telephone numbers.
